Profile

I'm a Software Engineer with +5 years of industry experience in software development. I specialize in JavaScript and React.

Professional Experience

Sutro Software, *Software Engineer* 🔗   08/2022 – present | US (Remote)

Sutro is an LLM-powered AI platform for developing full-stack applications. Here are a few examples of what I've done in Sutro so far:

- Implementing the "AI Assistant" feature from scratch, a chatbot that incrementally adds features to the user's app based on the user's feedback
- Improved usability and added various capabilities in the Studio and the Interpreter
- Led the design of our second product at Sutrohq.com

Genie.xyz, *Freelance UI Engineer* 🔗   04/2022 – 06/2022 | USA (Remote)

Acquired by Uniswap

- Rebuilt the Sweeping functionality and added more features, resulting in a better UX.
- Solved various UI issues and added smooth animations.

Digikala, *Front-End Developer (Contract)* 🔗   02/2022 – 03/2022

Designed & Developed a dashboard from scratch that'll be used internally by senior managers & co-founders at Digikala.com.

Piqo Design, *Co-founder & Project Manager* 🔗   12/2020 – 08/2021

- Introduced a new revenue model, resulting in a 300% increase in revenue.
- Developed landing pages for teams' products.
- Managed multiple client projects, from onboarding designers to the project and coordinating client expectations and cost negotiations with clients.

Riiha, *Front-End Team Lead* 🔗   07/2019 – 06/2020

- Led the relationship between the Front-end, Back-end, and the product owner
- Applied cutting-edge tools and concepts in the code-base
- Increased test coverage of some components to 95%.

RibalTech, *Front-End Web/Mobile Developer* 🔗   01/2018 – 07/2019

- Developed & maintained multiple B2C web & mobile projects.
- Co-built the largest React community in Iran 🔗

Education

Computing Studies & Information Systems,
Douglas College 🔗

05/2022 – present | Vancouver, Canada

Awards

Fanavard 97 • Web Development,
Sharif University of Technology 🔗

07/2018

   Our team came in first place in Fanavard's Web Development contest.

Projects

Reoverlay, *The missing solution for managing modals in React.* 🔗

Persian Supplier, *A handy Sketch plugin which supplies persian data.* 🔗

CocoTala, *An online jewelry auction app. (React Native)* 🔗

Sheed Antivirus, *Developed the landing page using GSAP.* 🔗
